### Green and smart mobility solutions

Leading societies to a low carbon future, Alstom develops and markets mobility solutions that provide the sustainable foundations for the future of transportation. Our product portfolio ranges from high-speed trains, metros, monorail, and trams to integrated systems, customised services, infrastructure, signalling, and digital mobility solutions. Alstom has 150,000 vehicles in commercial service worldwide.

### Meeting today's needs without compromising tomorrow

It is our responsibility to support the transition to sustainable mobility solutions that are accessible for all and to implement a sustainable business model.

We strive to develop efficient and sustainable solutions, manage our operations in a responsible way and foster a company culture of diversity and integrity. These are the building blocks for the company's success.

### A growing globalisation, a localised organisation, a touch point wherever you are:

In Taiwan, Alstom has been offering solutions for sustainable mobility in major cities such as Taipei, Kaohsiung and Taichung **over the last 40 years**.

Today, the **entire Metro Taipei network** is equipped **with the Group's signalling solutions**. Most recently, Alstom delivered the first driverless metro system for Taichung city and successfully introduced its world service proven Citadis tramway to Kaohsiung city.

## KEY FIGURES

**80** employees

**#1** signalling solution provider for Metro Taipei network

**3** turnkey metro projects secured in Taipei, with two ongoing

### INTEGRATED SYSTEM

- 35 four-car Metropolis trains, Urbalis 400 and integration for Taipei's Wanda-Zhonghe-Shulin Line Phases 1 and 2
- 29 four-car Metropolis trains, Urbalis 400 and integration for Taipei Circular Line Phase 2, and signalling revamp for Phase 1

### SIGNALLING

- Urbalis 400 for Taichung Green Line
- Accutrack Iconois for Taipei Tamsui-Xinyi Line, Songshan-Xindian Line, Zhonghe-Xinlu Line and Bannan Line
- Cityflo 650 for Taipei's Neihu Line
- ERTMS mainline signalling for Taiwan network

### ROLLING STOCK

- 15 Citadis X05 trams for Kaohsiung's circular light rail line
- 202 Innovia APM trains for Taipei's Neihu Line

### SERVICES

- Signalling services for Taiwan mainline

### INFRASTRUCTURE

- Electrification for Taipei-Kaohsiung Line

## MAIN REFERENCES

### Latest mobility innovations powering the public transport network of major cities

- **Kaohsiung's circular light rail line:** Design, delivery and commissioning of 15 Citadis X05 catenary-free trams, power supply and energy storage equipment, fully interoperable with the city's current network and planned extension. These are not only Alstom's first trams operating in Taiwan, but also mark the inaugural Asian launch of its latest evolution of the Citadis range.

- **Taichung Green Line:** Delivered the service proven Urbalis 400, platform screen doors and integrated control centre for the city's first driverless metro system, as part of a turnkey consortium. Also jointly supplied communication and CCTV systems, and fare collection system with local partner CTCL.

## PROJECTS ONGOING

### Seamless and reliable integrated metro systems for Taipei

- **Wanda-Zhonghe-Shulin Line:** Leading a French-Taiwanese consortium with CTCL to deliver an integrated system for the medium-capacity metro line, which will connect Taipei City to New Taipei City more seamlessly.
- **Taipei Circular Line:** Continued consortium partnership with CTCL to revamp of the fully automated (Grade of Automation 4) metro line's existing signalling system (Phase 1); and design, build, test and commission a new integrated system for Phase 2.

Giving back to the community:

**The Alstom Foundation** is the concrete expression of Alstom's corporate **citizenship commitment** and a means of **contributing sustainably to communities in need**.

**Access to Mobility**

**Access to Energy and Water**

**Economic and Social Development**

**Environmental Protection**

Established in November 2007, the Alstom Foundation supports and funds projects which serve to improve living conditions in, and economic prospects of, communities located near Alstom's facilities and sites around the world. All projects are conceived, presented and supported by Alstom employees who team up with expert partners and look to the Alstom Foundation to make a positive impact on the local environment. All projects are conducted in strong partnership with local or global NGOs with a proven ability to implement the projects on the ground.

By 2020, the Alstom Foundation has successfully supported 210 projects in 58 countries on 6 continents. All projects are conducted in strong partnership with local or global NGOs with a proven ability to implement the projects on the ground.

The 2022 cycle will start on 14 February. On this date, the online submission tool will be opened. The deadline for submissions will be 13 May.
